## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 rejected under 35 U.S.C. 103(a) as being unpatentable over US 4464850 (Ebert et al) in view of US 4517308 (Ehlenz).

Ebert teaches a shoe insole (insert) comprising a top layer (2) made of non-woven fabric (see col. 3, lines 29-33) and powder mixed within (see col. 2, lines 29-33) and a soft foam layer (see col. 3, lines 26-29) connected to an underside of the top layer. Ebert list several different powders, see col. 2, lines 29-33 but lacks teaching pumice powder. Ehlenz teaches an innersole (15) wherein the absorbent powder can be pumice stone; see col. Lines 23-36 and claim 4. It would have been obvious to provide the powder of Ebert to be from a pumice stone, as taught by Ebert, to further absorb and eliminate odors.

### *Conclusion*

3. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

--"A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section."

-Moreover, "The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06" MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
